Foreigners are forming a larger part of the MSM community.

FIGURE 16 – HIV-POSITIVITY BY YEAR

Q16

PREEXPOSURE PROPHYLAXIS (PREP)

- A HIV prevention pill has been approved in the United States for HIV negative people to reduce their risk of getting HIV.
- The pill has to be taken once every day and is less effective if not taken daily.
- People who take this pill must also see their healthcare provider every three months for followup visits.
