ROYAL GOVERNMENT OF BHUTAN

MINISTRY OF HEALTH

THIMPHU: BHUTAN

P. O. BOX: 726

## FOREWORD

The Ministry of Health is pleased to publish the Annual Health Bulletin 2016; the 29th series in its edition. It presents the status of nation's health and summary of health data and information on morbidity and mortality, patient case loads, health service coverage, health workforce, health infrastructure, health care cost and demographic statistics.

The health information in is an important national asset and cornerstone of our health system. In Bhutan, the need to have dynamic Health Management and Information System (HMIS) is becoming increasingly important for better planning and effective use of resources in the light of emerging challenges such as epidemiological transition, rising cost of health care, shrinking donor support and shift of focus of development partners on knowledge management. To this end, the ministry has been putting its best effort to strengthen the existing HMIS despite daunting challenges of inadequate ICT infrastructure and connectivity issues in the country. The ongoing efforts to improve the system include scaling up of online District Health Information System 2 (DHIS2), development of web-based Maternal and Child Health Tracking System and electronic Patient Information System (ePIS).

The bulletin is the most important annual periodical of the ministry prepared based on the wide range of information collected from the health centers nationwide. I hope that the bulletin will be of immense use for the policy-makers, planners, health care providers, development partners and the general public to support better planning and policy formulation, to track health-system performance and make effective health-related decisions.

**TASHI DELEK!**

TANDIN WANGCHUK  
MINISTER

## PART I : STATUS OF NATION'S HEALTH - 2016

### Introduction

There are records of traditional medicine being practiced in Bhutan as early as seventh century.(1) In seventeenth century, Zhabdrung Ngawang Namgyel (1594-1651) who founded Bhutan as a nation state introduced *Gso-ba Rig-pa* (traditional medicine) in the country with help of his physician Tenzin Drukpa. Thus the *Gso-ba Rig-pa* became the first form of medicine in Bhutan.(2) Drungtsho Pema Dorji returned to Bhutan as a qualified traditional physician in 1953, and the first traditional medicine dispensary was established at Dechencholing, Thimphu, on 28th June 1968.(1) Later in 1979, the first national indigenous hospital was established at its present location at Kawajangsa, Thimphu. In terms of modern (allopathic) medicine, Bhutan had its first Bhutanese doctor with MBBS degree in 1954. There were two hospitals (Thimphu and Samtse) and 11 dispensaries in 1961.(1) Since then there has been remarkable expansion of health services. As a result, Bhutan now has 31 hospitals (including one indigenous hospital at Thimphu), 235 Basic Health Units and Sub-Posts, 52 Indigenous Units, and 562 Outreach Clinics providing both traditional and modern medicine as two arms of the Ministry of Health. Thereby, giving Bhutanese people choice on the type of medicinal treatments.

It is the Principles of State Policy that the “State shall provide free access to basic public health services in both modern and traditional medicines” in Bhutan.(3) In pursuance of the Principles of State Policy and towards achieving Ministry of Health’s vision of being a “Nation with the best Health”, the Ministry continuously endeavor to provide healthcare services of quality in both traditional and modern medicines; to prevent, control, eliminate and eradicate diseases; to rehabilitate and promote healthy living; and to ensure sustainable, responsive, equitable, accessible, reliable and affordable health services.(1) As a result, Bhutan has made a commendable progress in achieving both national as well as international goals and targets.

Nonetheless, despite of the Ministry’s rigorous efforts and achievements, the rising trend of Non-Communicable Diseases (NCDs) is a cause of concern for the country. According to a survey carried out in 2014, 13.5% of adult Bhutanese population (18-69 years) were having three or more risk factors for developing NCDs.(4) Similarly, another survey found that the current childhood stunting prevalence in Bhutan is 21.2% and anemia prevalence among children aged 6 – 59 months is 43.8%, which as per WHO’s categorization are serious public health concern.(5) On the other hand, Bhutan is still battling communicable

diseases such as HIV/AIDS, MDR-TB, STIs, and emerging climate-sensitive diseases like dengue. Thus, Bhutan is battling double burden of non-communicable and communicable diseases. In this light, status of nation's health will be presented as;

- i. Status of Millennium Development Goals of health related indicators in Bhutan
- ii. Morbidity and mortality pattern of diseases (non-communicable diseases and communicable diseases) in 2015,
- iii. Infrastructure and human resource update, and
- iv. Health expenditure and financing update

## SECTION 1: Status of Millennium Development Goals of Health Related Indicators

The era of Millennium Development Goals (MDG) came to an end in 2015 and gave way to Sustainable Development Goals. Therefore, it's a right time to present the MDG achievements status of Bhutan. Four of the eight MDGs, viz., reduce child mortality, improve maternal health, combat HIV/AIDS, malaria & other diseases, and ensure environmental sustainability had 12 health-related indicators. Bhutan's achievements on the health-related targets are commendable (Table 1.1).

**Table 1.1 Health related Millennium Development Goals and achievement status in Bhutan**

Millennium Development Goals	1990	2012 <sup>†</sup>	State of progress
<b>Goal 4: Reduce Child Mortality</b>			
Under-Fiver Mortality Rate (per 1000 live births)	123	37.3	Achieved
Infant Mortality Rate (per 1000 live births)	90	30	Achieved
Proportion of Children covered under Immunization Programme (%)	84	95.1	Achieved
<b>Goal 5: Improve maternal health</b>			
Maternal Mortality Ratio (per 100,000 live births)	560	86	Achieved
Births attended by skilled health personnel (%)	15	74.6	Achieved
<b>Goal 6: Combat HIV/AIDS, malaria &amp; other diseases</b>			
HIV cases detected	0	432 <sup>‡</sup> (July 2015)	-
Contraception prevalence rate (%)	18.8	65.6 (BMIS 2010)	Achieved
Number of malaria cases and incidences (cases per 100,000)	22126 (1991)	6.1 (AHB 2013)	Achieved
Number of TB cases and incidences (cases per 100,000)	4232	225 (AHB 2013)	Achieved
<b>Goal 7: Ensure Environmental Sustainability</b>			
Proportion of population without sustainable access to an improved water source (%)	55	2.3	Achieved
Proportion of population without sustainable access to an improved sanitation (%)	33 (1994)	31.7 (NNS 2015)	*
Proportion of population using solid fuels (%)	75 (2000)	-	No Data

NNS – National Nutrition Survey, NHS – National Health Survey, BMIS – Bhutan Multiple Indictors Survey,

AHB – Annual Health Bulletin

\* Due to the change in definition of 'improved sanitation' in the later surveys, the proportion of population without sustainable access to an improved sanitation doesn't show much change. However, as per BLSS 2003, Bhutan has achieved MDG target - access to improved sanitation. Also, when compared to BMIS 2010 the proportion has decreased from 41.6% to 31.7% in 2015.

<sup>†</sup> Data source: National Health Survey 2012 otherwise indicated.

<sup>‡</sup> National HIV/AIDS Control Programme, Ministry of Health

\* Due to the change in definition of 'improved sanitation' in the later surveys, the proportion of population without sustainable access to an improved sanitation doesn't show much change. However, as per BLSS 2003, Bhutan has achieved MDG target - access to improved sanitation. Also, when compared to BMIS 2010 the proportion has decreased from 41.6% to 31.7% in 2015.

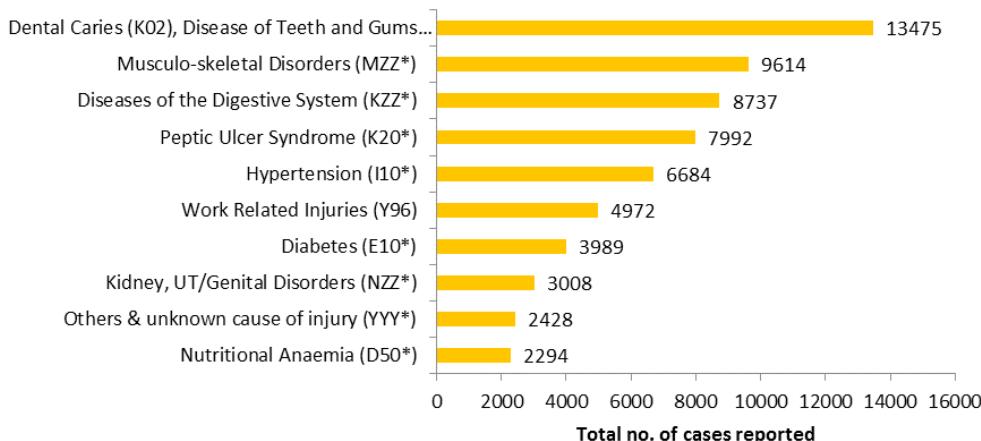

## SECTION 2: Morbidity and Mortality Pattern of diseases 2015

### 2.1 Non-Communicable diseases

The Non-Communicable Disease (NCD) risk factors STEPS Survey, conducted in 2014, estimated that 13.5% of adult Bhutanese population (18-69 years) had three or more of the modifiable NCD risk factors. The survey also found that 7.4% smoked tobacco, 42.4% consumed alcohol, 66.9% took less than five servings of fruits and vegetables, 6.4% had insufficient physical activity and 33% were overweight. The prevalence of impaired fasting glycaemia among the adult Bhutanese was 10.7% and 6.4% adult Bhutanese had raised fasting glucose. The percentage with raised cholesterol level was 12.5% and the mean salt intake was 9.0 gm/day.(4)

Correspondingly, the health facilities of Bhutan have been reporting increasing number of NCDs cases every year. Figure 2.1.1 shows the top-ten NCDs cases reported by the health facilities in 2015. Most of the NCDs in the top-ten are directly related to one or more modifiable risk factors mentioned above. The health facilities in Bhutan reported that 12.3% of total deaths (n=1284) in 2015 was due to alcohol liver diseases and it is the number one cause of mortality in Bhutan (Figure 2.3.1).

**Figure 2.1.1 Top-Ten Noncommunicable Diseases reported by the health centers of Bhutan in 2015**

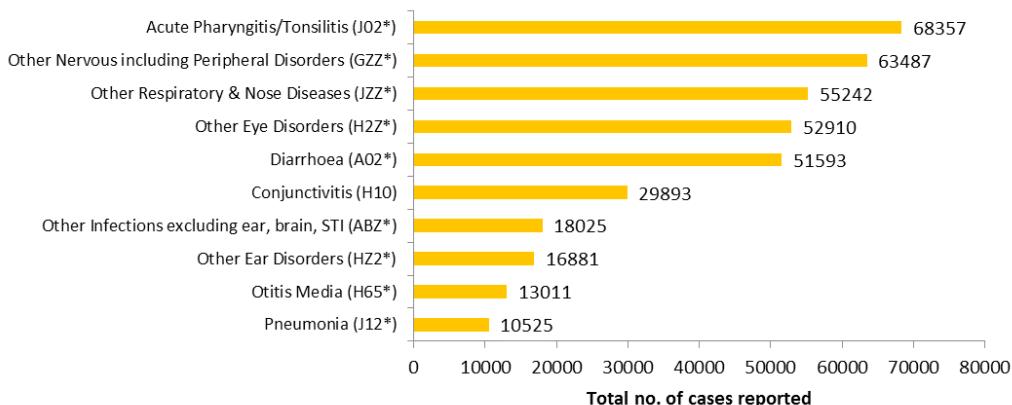

### 2.2 Communicable diseases

The malaria cases in Bhutan have remarkably reduced from 39852 cases in 1994 to 34 cases (all types) in 2015. However, other communicable diseases such as MDR-TB are on the rise posing a serious threat to the well-being of the people. The figure 2.2.1 shows the top-

ten communicable diseases, reported by the health facilities of Bhutan in the year 2015. The five most prevalent communicable diseases reported by health facilities of Bhutan are acute pharyngitis/tonsillitis (68,357 cases), nervous including peripheral disorders (63,487 cases), other respiratory & nose diseases (55,242 cases), other eye disorders (52,910 cases), and diarrhoea (51,593 cases).

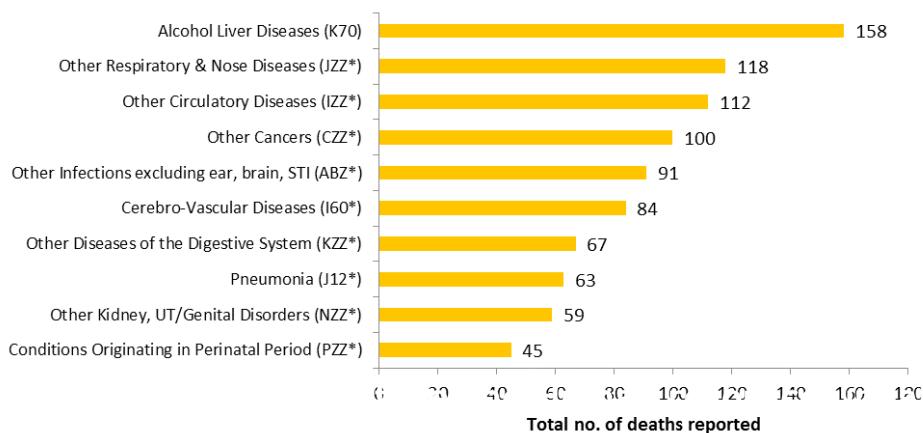

**Figure 2.2.1 Top-Ten Communicable Diseases reported by the health centers of Bhutan in 2015**

### 2.3 Mortality Reported by Health Facilities of Bhutan

In the year 2015, the health facilities of Bhutan reported a total of 1284 deaths. Alcohol liver disease was the number one cause of mortality (158 deaths) followed by other respiratory & nose diseases (118 diseases) and other circulatory diseases (Figure 2.3.1).

**Figure 2.3.1 Top-ten Causes of Mortality Reproted by the health facilities of Bhutan, 2015**

## SECTION 3: Infrastructure and Human Resource Update

In 1956, a 20-bedded indigenously architected hospital at Thimphu, was completed and hospital at Samtse with 10 beds was built. Thus, in 1961 we had two hospitals (Thimphu and Samtse) and 11 dispensaries at Haa, Paro, Trongsa, Bumthang, Trashigang, Sibsoo, Tsirang, Samdrupjungkhar, Kalikhola and Dagapela.(1) As of today there are 31 hospitals (including one indigenous hospital), 235 BHUs (including Sub-Posts), and 562 Outreach Clinics (with and without sheds).

On the human resources front, Dr. Tobgyel reported for duty at Dechencholing Palace in Thimphu as the first Bhutanese doctor in 1954.(1) Since then Bhutan has been continuously sending students to pursue various health/medical trainings to other countries as well as to upgrade the qualification of the healthcare providers. Moreover, the Royal Government of Bhutan started Faculty of Nursing and Public Health (formerly known as Royal Institute of Health Science) in 1974 to address the ever increasing demand for healthcare providers in the country. Bhutan had its first qualified traditional physician in 1953 and the first school for traditional medicine were established in Thimphu in 1979. (1) Faculty of Traditional Medicines (formerly known as National Institute of Traditional Medicine) continues to train traditional healthcare providers in the country ever since its establishment. Further, Khesar Gyalpo University of Medical Sciences of Bhutan – the first medial university of Bhutan was established as an “overarching university for existing institutions engaged in medical and health care education and training programme in the country and new institutions established hereinafter”.(6) The newly established Faculty of Medicines under the university started PG Residency Programme for MBBS graduates from 2014. Bhutan now has a total of 251 doctors, 1105 nurses, and 548 health assistants (Table 3.1). The country also has 47 indigenous physicians and 100 sMenpas.

**Table 3.1 Number of healthcare providers in health facilities of Bhutan categorized by gender, 2015**

Categories of healthcare providers	Gender		Total
	Male	Female	
Doctors (MBBS/Specialists)	176	75	251
Clinical Officers (CO)	30	5	35
Nurses (Assistant Nurse/GNM/B. Sc. Nurse) /HA	734	884	1618
Drungtshos/ sMenpas	109	38	147
Pharmacists/Lab. Technologist/Physiotherapist/Technicians	591	374	965

## **SECTION 4: Health Expenditure and Financing**

Bhutanese people receive free health care including referral out of Bhutan. However, with new emerging diseases including non-communicable diseases such as cancer and kidney failures, the country is facing the challenges of rise in health expenditure including referral cost.(7,8)

Luckily, the wise leaders of Bhutan, foreseeing the raising trend of health expenditure founded Bhutan Health Trust Fund (BHTF) in 1997, and formally launched it on 12th May 1998.(9) Since then there has been generous support of the well-wishers of Bhutan and kind donors. As a result, as of September 2015, BHTF had a corpus sum of Nu. 1.3 billion.(10)

In keeping with BHTF's objective and as a special tribute to His Majesty the Fourth Druk Gyalpo, Jigme Singye Wangchuck, during the 60th Birth Anniversary of His Majesty BHTF has started financing procurement of vaccines and Essential Drugs from 2015-16 fiscal years.(11)

### **Conclusion**

Bhutan has an exemplary healthcare system wherein both traditional and modern medicine are provided at free of cost to its people. As a result, Bhutan has made impressive progress in achieving its national and international goals and targets. Nonetheless, it is confronted with new challenges such as double burden of noncommunicable and communicable diseases, sustainability of its free healthcare system, and shortages of healthcare providers.

	6.5 HIV infection with associated incidence and death rates associated with malaria (cases per 100,000)	-	927	257	77.0	6.1	Country reported program data – VDCP, DoPH, MoH & AHB 2014.
	6.6.a Incidence and death rates associated with malaria (deaths per 100,000)	-	2.3	0.7	0.3	0.0	NTCP, DoPH, MoH & Global Tuberculosis report.
<b>6.C</b>	6.6.b Incidence, prevalence and death rates associated with tuberculosis (prevalence per 100,000)	1860	754	536	313	225	Country reported program data – NTCP, DoPH, MoH & Global Tuberculosis report.
	6.7.a Incidence, prevalence and death rates associated with tuberculosis (deaths per 100,000)	194	73.0	53.0	15.0	14.0	
	6.7.b Tuberculosis notification rate (all new + relapse cases per 100,000)	215	202	155	183	147	Country reported program data – NTCP, DoPH, MoH & Global Tuberculosis report.
<b>7.C</b>	6.9.b Tuberculosis treatment success rate (%)	-	90.0	91.0	90.0	90.0	NHS 2000, PHCB 2005, BMIS
	7.8 Proportion of population using an improved drinking water source (%)	-	77.8	84.2	96.1	97.7	NHS 2010 & NHS 2012.
	7.9 Proportion of population using an improved sanitation facility (%)	-	88.0*	87.3*	58.4#	66.3+	

- Indicates: Data Not Available; \* Includes Pit Latrines w/out slab; # Excludes Shared facilities; + Includes shared facilities.

## PART IV National Health Indicators

Sl.#	Indicators	Life expectancy, fertility and mortality					Source
		1994	2000	2005	2010	2015	
1	Life expectancy at birth [years]	66.1	-	66.3 (projected)	68.9	-	NHS 1994, PHCB 2005, Population Projections of Bhutan 2005-2030, NSB.
2	Crude birth rate (CBR) [births per 1000 population]	39.9	34.1	20.0	19.7	17.9	NHS 1994, NHS 2000, PHCB 2005, BMIS 2010 & NHS 2012.
3	Total Fertility Rate (TFR) [children per woman]	5.6	4.7	3.6	2.6	2.3	NHS 1994, NHS 2000, PHCB 2005, BMIS 2010 & NHS 2012.
4	General fertility rate (GFR) [births per 1000 women 15-49 years]	173	143	79.4	-	72.0	NHS 1994, NHS 2000, PHCB 2005 & NHS 2012.
5	Adolescent birth/fertility rate [births per 1000 adolescent women 15-19 years]	120	61.7	-	59.0	28.4	NHS 1994, NHS 2000, BMIS 2010 & NHS 2012.
6	Crude death rate (CDR) [deaths per 1000 population]	9.0	8.6	7.0	-	6.2	NHS 1994, NHS 2000, PHCB 2005 & NHS 2012.
7	Under-five mortality rate (U5MR) [deaths per 1000 live births]	96.9	84.0	61.5	69.0	37.3	NHS 1994, NHS 2000, PHCB 2005, BMIS 2010 & NHS 2012.
8	Infant mortality rate (IMR) [deaths per 1000 live births]	70.7	60.5	40.1	47.0	30.0	NHS 1994, NHS 2000, PHCB 2005, BMIS 2010 & NHS 2012.
9	Maternal mortality ratio (MMR) [deaths per 100,000 live births]	380	255	-	-	86.0	NHS 1994, NHS 2000 & NHS 2012.
10	Sex ratio at birth [males per 100 females]	105	106	101	-	104	NHS 1994, NHS 2000, PHCB 2005 & NHS 2012.
11	Sex ratio of the population [males per 100 females]	91.0	94.7	111	-	96.0	NHS 1994, NHS 2000, PHCB 2005 & NHS 2012.

Note: - indicates Data Not Available.

Table 2: Cause-specific morbidity and mortality

Table 2.1 Trends of selected morbidity indicators, 2011 - 2015

Sl.#	Indicators	Year					Source
		2011	2012	2013	2014	2015	
1	Alcohol Liver Diseases incidence (per 10,000 population)	29	29	36	42	41	HMIS, MoH
2	Cancer incidence (per 10,000 population)	14	12	13	13	13	HMIS, MoH
3	Conjunctivitis incidence (per 10,000 population)	487	529	564	567	395	HMIS, MoH
4	Diabetes incidence (per 10,000 population)	53	57	80	134	164	HMIS, MoH
5	Diarrhoea incidence (per 10,000 under 5 children)	2257	2368	1927	2244	2004	HMIS, MoH
6	Depression incidence (per 10,000 population)	7	8	9	8	9	HMIS, MoH
7	Hypertension incidence per 10,000 population	325	375	409	469	458	HMIS, MoH
8	Intestinal Worms incidence (per 10,000 under 5 children)	186	133	129	118	96	HMIS, MoH
9	Malaria incidence (per 10,000 population at risk)	5	2	1	1	2	HMIS, MoH
10	Pneumonia incidence (per 10,000 under 5 children)	974	1204	1080	1138	905	HMIS, MoH
11	Skin infections (per 10,000 population)	1463	1444	1316	1335	1218	HMIS, MoH
12	STD/STI incidence (per 10,000 population)	12	41	59	72	92	HMIS, MoH
13	Tuberculosis prevalence rate (per 10,000 population)	15	16	15	15	13	HMIS, MoH
